Subject: **Arizona Burn Symposium**

The 2026 Arizona Burn Symposium will bring together healthcare professionals, researchers, industry leaders, first responders, and advocates in Phoenix, Arizona, to advance the future of burn care. This year's theme, **Igniting Innovation: Illuminating Advances in Burn Science and Technology**, highlights our commitment to exploring breakthroughs and emerging technologies that are transforming burn treatment, rehabilitation, and recovery.

The Arizona Burn Symposium serves as a premier forum for multidisciplinary education, collaboration, and professional development. Through expert presentations and evidence-based discussions, attendees will gain valuable insights into the latest advances in burn science while building connections that improve patient outcomes. Our mission remains focused on enhancing the lives of burn survivors and their families. By bringing together experts from across the continuum of care, we create opportunities to share knowledge, inspire innovation, and advance clinical excellence.

The success of this symposium is made possible through the support of organizations that share our vision. As a sponsor, your organization will engage directly with burn surgeons, physicians, nurses, therapists, first responders, researchers, and other healthcare leaders from across Arizona and the Southwest while demonstrating a commitment to advancing burn care.

We are pleased to offer a variety of sponsorship opportunities that provide visibility, foster meaningful connections, and support high-quality educational programming. Your investment directly strengthens the knowledge and expertise of professionals dedicated to caring for this complex patient population.

Together, we can ignite innovation, illuminate possibilities, and shape the future of burn care. To learn more about sponsorship opportunities, please contact Rosa Guerrero, Administrative Coordinator.

Thank you for your consideration and support of burn care education and innovation.

Warm regards,

Dr. Kevin Foster, MD, MBA, FACS
Medical Director | Burn Attending Physician
